## **Launch of Axitinib by Beta Drugs Ltd**

After the two successful product launches, "BEEDAN" brand of Dasatinib & "Gem-RTU" brand of Ready to Use Gemcitabine in Indian Oncology market, Beta Drugs is launching "BEXINIB" brand of Axitinib. Axitinib is a targeted therapy that has significant role in Advanced Renal Cancer.

In India, every year more than 40000 new patients diagnosed with Renal Cell Carcinoma may need Axitinib for better survival, but high therapy cost restrains them to take Axitinib. Launch of BEXINIB will reduce Axitinib cost drastically and allow a greater number of patients to be benefited by this medicine.

In addition, the company is planning to launch many more innovative products to treat Hematological malignancies and solid tumors. It has developed Liposomal Amphotericin B which is a unique lipid formulation used in the treatment of Fungal infections in the cancer patients. The company plans to launch this product next month. As there are not many manufacturers for this product, Beta expects to garner a sizable market in this product.
