## **New Product Launches**

Beta Drugs has developed and launched a new NDDS (New Drug Delivery System) in Gemcitabine. Gemcitabine is a chemotherapy medication used to treat a number of types of cancer. These cancers include breast cancer, ovarian cancer, non-small cell lung cancer, pancreatic cancer, and bladder cancer.

The total market size of Gemcitabine is around Rs 50cr. Beta currently holds around 1% market share which it expects to grow exponentially in the next few years.

In addition, the company has also developed new product i.e. Liposomal Amphotericin B which is a unique lipid formulation used in the treatment of Fungal infections in the cancer patients. The company plans to launch this product next month. The total market size of this product is around Rs 55Cr+. As there are not many manufacturers for this product, Beta expects to garner a sizable market in this product.
